Packing Line Refill Module

**Optimise packing
throughput**

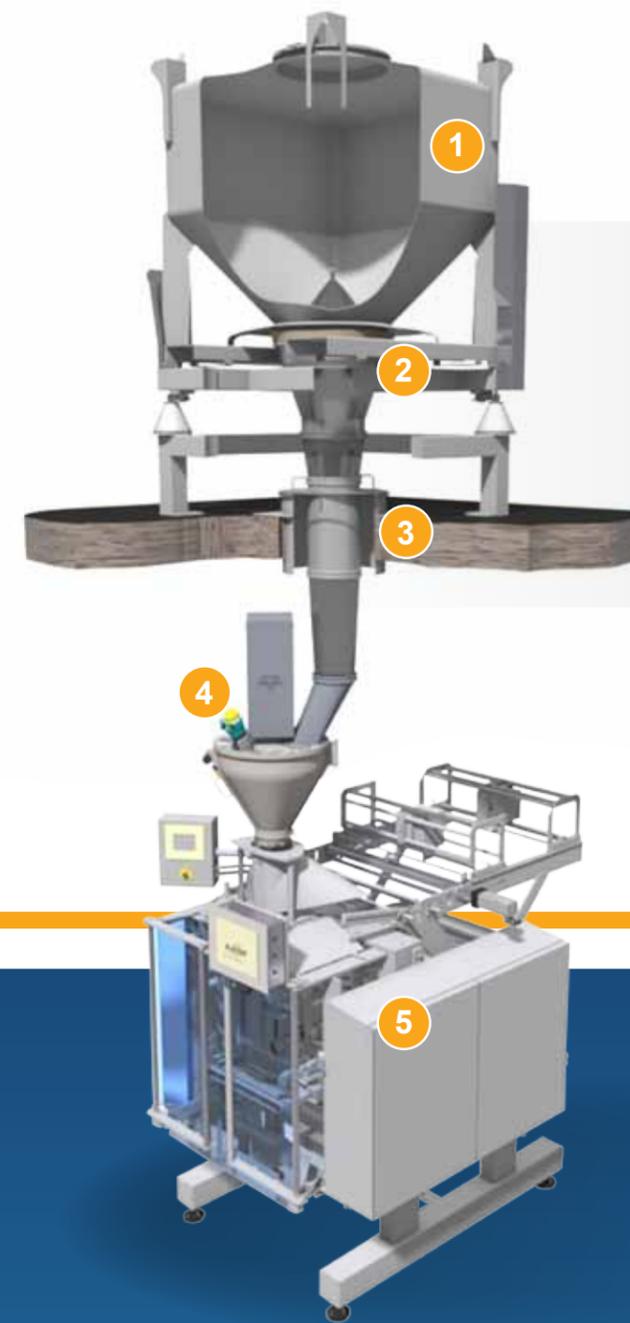

www.matconibc.com

Packing Line Refill Module...

...minimises the risk of **segregation** and delivers a **high quality mix** to the final consumer pack.

Key Features

- 1 Intermediate Bulk Container (IBC)
- 2 Cone Valve & Discharge Station
- 3 Hygienic Through Floor Connection
- 4 Hopper Level Probe
- 5 FFS Packing Machine

The Goals of Lean Powder Processing

- Reduce the cost per kilogram manufactured
- Reduce inventory – improve cash utilisation
- Maximise plant flexibility - make to order
- Enable rapid product change-over
- Optimise flow manufacturing

Key Benefits

- ▶ Decoupled operation for maximum flexibility
- ▶ Controlled & consistent feed to packing lines
- ▶ Overcomes powder blocking, bridging, flushing
- ▶ Quick changeover for high OEE
- ▶ Ability to run small campaigns efficiently
- ▶ Integrates with any packing line design

Re-fill direct to level probe -
No need for cross feeder
